# Meditations for keyboards and string instruments

2019

The work consists in one hundred short pieces for a keyboard instrument, like piano, toy piano, harpsichord or celesta and an equal number of short pieces for a string instrument like guitar, mandolin or ukulele. Keyboard pieces can be played either with both hands or with only one - the score never requires both hands at the same time. The pieces can be performed in any combination on any number and combination of said instruments. If keyboards are omitted from the performance altogether, then the title of the work should be amended accordingly. Likewise for the string instruments. The musicians play without a common time. Intonation need not be agreed upon. Duration is free.
